Number and Place Value	<ul style="list-style-type: none"> • Read and write numbers up to one thousand. • Be able to identify the value of any digit up to a thousand, including being able to label the columns of such a number. • Be able to partition numbers up to 1000 and apply partitioning related to place value using varied and increasingly complex problems, building on work in year 2 (for example, $146 = 100 + 40 + 6$, $146 = 130 + 16$). • Order and compare numbers up to 1000, using $>$ and $<$ signs. • Count forwards or backwards by powers of 10 up to 1000 (10, 100). • Be able to plot numbers up to 1000 on number lines with different scales. • Identify, represent and estimate numbers using different representations. • Solve written, numerical, and practical problems involving the information and knowledge included in this unit. • Be able to count in multiples 2, 3, 4, 5, 8, 10, 50 and 100. 	Knowledge <ul style="list-style-type: none"> • Know that each column increases by a power of 10. • Know that number have the following columns: Hundreds, Tens, Ones. 	Vocabulary <ul style="list-style-type: none"> • Powers of 10 • Columns • Greater than • Less than • Partition <ul style="list-style-type: none"> • Integer • Digit

	Disciplinary	Substantive
Geometry	<ul style="list-style-type: none"> Identify a range of polygons and be able to describe them using the language of vertices and edges. (Square, Oblong (noting that rectangle is often used to describe this shape), Circle (infinite edges and vertices), Triangle, Rhombus, Parallelogram, Trapezium, Pentagon, Hexagon, Heptagon, Octagon). Draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them. Recognise angles as a property of shape or a description of a turn. Identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn. Identify whether angles are greater than or less than a right angle, and describe these as either acute or obtuse. Identify horizontal and vertical lines and pairs of perpendicular and parallel lines. 	<p>Knowledge</p> <ul style="list-style-type: none"> Know that vertices are the corners of a shape. Know that edges are the straight lines in a shape. Know that right angle is exactly 90 degrees. Know that an angle less than a right-angle is called acute. Know that an angle greater than a right-angle and less than a straight line is called obtuse. Know that parallel lines stay the same distance apart at all points, and never touch. Know perpendicular lines meet at a right-angle.
		<p>Vocabulary</p> <ul style="list-style-type: none"> Right-angle, Vertex, Edge, Face, Parallel, Perpendicular, Horizontal, Vertical.
